

Provide full State funding for mandated environmental regulation programs, such as ISTA, Shoreland, Wetlands and Local Water Planning	Natural Resources Block Grant authorized under M.S. §§103B.101 and 103B.3369		In certain cases, counties act as administrative extensions of State government, enforcing State regulations or administering State programs; presumably State agencies that perform similar functions are adequately funded by State resources; counties should receive the same consideration when carrying out a State-wide function.
