Office of the State Auditor

Rebecca Otto
State Auditor

FINANCIAL and INVESTMENT REPORT of VOLUNTEER FIRE RELIEF ASSOCIATIONS

For the Year Ended December 31, 2013

Description of the Office of the State Auditor

The mission of the Office of the State Auditor is to oversee local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities.

Through financial, compliance, and special audits, the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The State Auditor performs approximately 150 financial and compliance audits per year and has oversight responsibilities for over 3,300 local units of government throughout the state. The office currently maintains five divisions:

Audit Practice - conducts financial and legal compliance audits of local governments;

Government Information - collects and analyzes financial information for cities, towns, counties, and special districts;

Legal/Special Investigations - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law; as well as investigates allegations of misfeasance, malfeasance, and nonfeasance in local government;

Pension - monitors investment, financial, and actuarial reporting for approximately 700 public pension funds; and

Tax Increment Financing - promotes compliance and accountability in local governments' use of tax increment financing through financial and compliance audits.

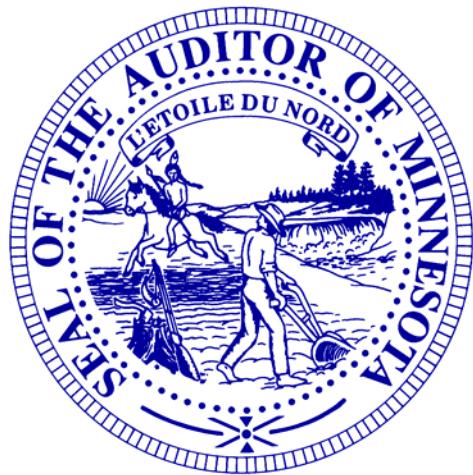

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange Board, Public Employees Retirement Association Board, Minnesota Housing Finance Agency, and the Rural Finance Authority Board.

Scope and Methodology

This report summarizes and evaluates the finances, basic benefit structure, and investment performance of Minnesota's volunteer fire relief associations (relief associations). Relief associations are governmental entities that receive and manage public money to provide retirement benefits for individuals providing the governmental services of firefighting and emergency first response. Relief associations are required under Minnesota Statutes, chapters 69, 356, and 424A to report annually financial, investment, and plan administration information to the Office of the State Auditor, and the State Auditor is required to provide a detailed report to the Legislature under Minnesota Statutes, sections 6.72 and 356.219.

During 2013, 656 relief associations were in existence in Minnesota. This report includes information on 651 of the 656 relief associations. Four relief associations are not included in this report because the accuracy of certain data could not be determined in time for inclusion.¹ The fifth relief association incorporated during the year.

To obtain analogous comparisons of investment performance, the Office of the State Auditor calculates rates of return for each relief association using a uniform calculation method. Minnesota Statutes, section 356.219, requires the Office of the State Auditor to compute and report total portfolio rates of return, net of all costs and fees. Using a uniform calculation method allows for a fair comparison of investment performance among relief associations. Custom benchmark rates of return calculated by the Office of the State Auditor for each relief association provide a standard against which investment performance may be measured for this group.

This report can be used by relief association trustees and municipal officials to compare their associations to those relief associations with similar plan types. Comparisons can be made on rates of return, net assets, funding ratios, and other reporting information. Regional maps are included to assist relief associations in determining average benefit levels and rates of return for their specific regions.

Data tables included in this report provide financial, membership, benefit, and investment information. Tables 2-A, 2-B, and 2-C show the key financial and investment indicators for each relief association, including net assets and rates of return. The funding ratios and financial requirement components for each relief association are provided in Tables 3-A, 3-B, and 3-C. Tables 4-A, 4-B, and 4-C show the revenues and expenditures for each relief association. Membership and bylaw information are provided in Tables 5-A, 5-B, and 5-C, while benefit amounts are provided in Tables 6-A, 6-B, and 6-C. Tables 7 and 8 provide investment information for each relief association.

¹ The relief associations excluded from this report were four defined-benefit lump-sum plans.

This page is intentionally left blank.

Executive Summary

- Relief associations held \$523.7 million in net assets at the end of 2013, representing accrued benefits for 19,194 firefighters. (Pages 6 and 33)
- Investment gains totaled \$68.1 million in 2013, a 60.2 percent increase from the \$42.5 million in investment earnings during 2012. (Page 8)
- In 2013, relief associations received \$23.8 million in state aid, a 39.2 percent increase from the amount received in 2012. The increase in the total state aid is largely due to the supplemental state aid program established during 2013. (Page 10)
- Relief associations received \$9.0 million in municipal contributions in 2013, a 4.3 percent decrease from the \$9.4 million received in 2012. Of the \$9.0 million received in municipal contributions, \$5.4 million was required to be contributed by statute. The \$5.4 million in required municipal contributions is an increase of 1.9 percent from the \$5.3 million required for 2012. (Page 11)
- In 2013, there were 1,393 benefit disbursements to members or their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits. The 1,393 benefit disbursements were 1.3 percent higher than the 1,375 benefit disbursements that were made during 2012. (Page 6)
- A total of \$29.1 million in service pensions was paid out by 373 different relief associations in 2013. The \$29.1 million paid out represents a 2.7 percent decrease from the \$29.9 million paid in 2012. (Page 19)
- In 2013, relief associations had an average rate of return of 12.8 percent. Investment returns increased from the 8.5 percent average rate of return in 2012. (Page 14)
- Rates of return for 356, or 54.7 percent of relief associations, matched or exceeded their calculated custom benchmark rates of return during 2013. This is down from the 70.0 percent of relief associations that matched or exceeded their benchmark return in 2012. (Page 16)
- The average rate of return for relief associations over the past fifteen years was 4.3 percent, below the statutory interest rate assumption of five percent. There were 120 relief associations, or 19.0 percent, over the last fifteen years that had average rates of return of at least five percent. About 6.3 percent of relief associations had rates of return that were equal to or greater than the State Board of Investment's Income Share Account for the fifteen-year period. (Pages 16 and 17)

Recommendations

- Relief associations should make sure that their investment policies include specific target asset allocations and accurately reflect the investment strategy of their plan. Relief associations should also periodically review their plans' asset allocation to determine if it is appropriate given their investment goals, specific membership profile, and risk tolerance.
- In general, relief associations should consider investing in balanced portfolios to avoid major investment losses in a single asset class. The investment policy should be crafted and maintained with a long-term investment perspective in mind. Relief associations must be able to withstand the significant losses that occasionally occur in particular asset classes, and trustees should take a long-term view of the performance of these assets. Moving out of certain investments after their value has declined eliminates the chance of benefiting from eventual market recoveries.
- Relief association trustees should understand their fund managers' investment strategies and hold investment advisors accountable for the performance of the assets being managed. Relief association trustees are not relieved of their fiduciary duties by hiring professional consultants or investment advisors. Trustees and members should regularly compare the investment performance of their advisors with the performance of passively-managed index funds and other benchmarks.
- Relief association trustees are encouraged to work cooperatively with municipal officials, and municipal officials who serve as trustees on the association board are encouraged to be thoroughly familiar with the association's finances and investment performance.
- Relief association boards should have a goal of achieving full funding and maintaining a healthy funding ratio. Relief associations that are not fully funded must carefully balance the desire to maintain benefit levels with the duty to ensure that the association remains financially stable for the long term.
- To ensure the long-term health of a plan, relief association trustees and municipal officials should be cautious when considering benefit changes. Relief association trustees, members, municipalities, and independent nonprofit firefighting corporation boards should understand the effects that benefit changes have on contribution requirements and the long-term health of the plan before approving new benefit levels. Implementing smaller, but more frequent, benefit changes may provide more stability to municipalities that are required to make contributions, and make benefit amounts more consistent over time.

Plan Types

A relief association's plan type is characterized by how the plan is funded. Relief associations can either be defined-contribution retirement plans or defined-benefit retirement plans. A defined-contribution retirement plan provides a retirement benefit with predetermined funding. The unknown variable for a defined-contribution retirement plan is what a member's benefit amount will be at retirement. The benefit amount is equal to the member's individual account balance at the time of retirement. Members of defined-contribution plans receive equal shares of state and municipal contributions and prorated shares of investment earnings. Account balances vary from year to year based on investment performance, revenues, and expenses. Members of a defined-contribution plan receive a one-time lump-sum payment when they retire.

A defined-benefit retirement plan provides a retirement benefit that is predetermined based on a formula. The unknown variable for a defined-benefit retirement plan is the amount of funding needed to support the predetermined benefits. Benefits are primarily funded through a combination of fire state aid, municipal contributions, and investment earnings. When revenue from one of these funding sources decreases, pressure may be put on the other funding sources to make up the difference. If a relief association experiences investment losses, for example, a municipality may need to increase its contributions to the association so that benefits are sufficiently funded.

Relief associations electing to administer defined-benefit retirement plans are further characterized by how benefits are payable. Defined-benefit retirement plans may either pay benefits as a one-time lump-sum payment or as a monthly payment made from the time of retirement until the member's death.

Nearly 83 percent of relief associations in Minnesota are lump-sum plans, meaning that they pay benefits as a one-time lump-sum payment to members upon their retirement. In lump-sum plans, benefits are paid to members based on an annual benefit level in effect at the time of the member's separation from active service and membership. Lump-sum plans are the most common plan type because they are generally easier to administer and have fewer associated administrative costs.

Only 23, or 3.5 percent, of relief associations offered monthly benefits to retirees. Of these relief associations, 20 provide their members with a choice at retirement of receiving a monthly benefit or a lump-sum benefit. Three relief associations provided only monthly benefits to their members. Monthly benefits are based on the member's years of service and a monthly benefit amount, and are paid from the time of retirement until the member's death. Monthly benefit plans are the least common type of plan due to their complexity and higher administrative costs. In fact, the majority of the 20 relief associations that offer their members a choice of receiving a monthly or a lump-sum benefit have discontinued the monthly benefit option for future members.

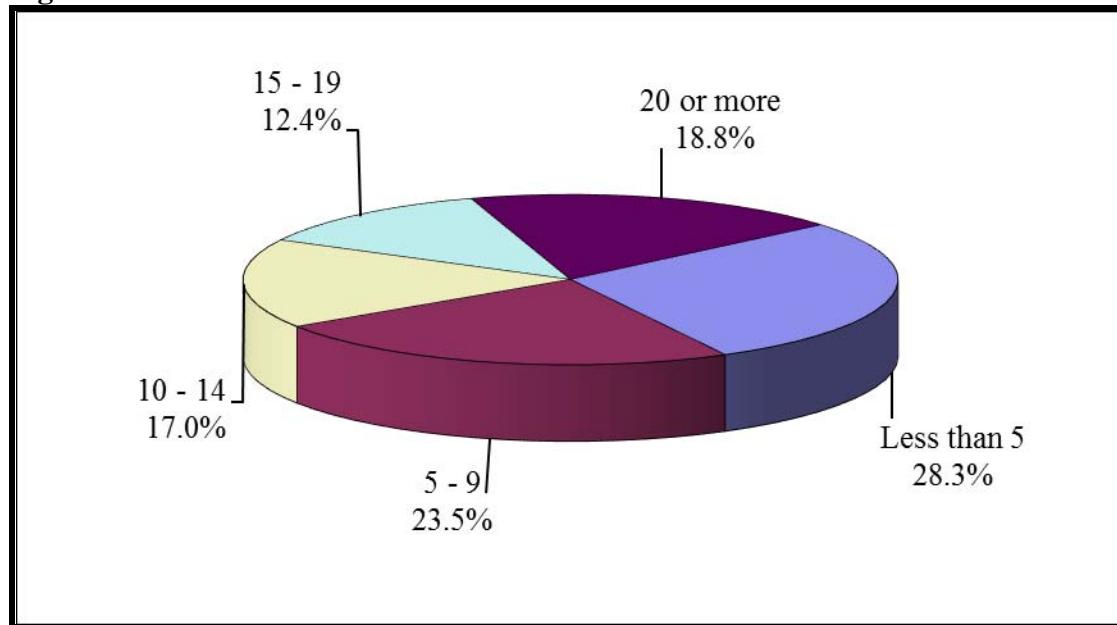

Demographics

During 2013, there were 19,194 relief association members who were active, inactive, or deferred. Of the 19,194 relief association members, 15,968 were active members. In 2013, there were 1,393 benefit disbursements made to members or their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits. The 1,393 benefit disbursements made were up 1.3 percent when compared to the 1,375 benefit disbursements in 2012.

In 2013, 28.3 percent of active lump-sum and defined-contribution members had fewer than five years of active service.² Slightly over half, or 51.8 percent, of the active members had fewer than ten years of service. Of the 628 lump-sum and defined-contribution plans included in this report, 484 had vesting requirements of ten years or more. Assuming a ten-year vesting requirement, over one-half of the active members in these plan types would not yet be eligible to receive pension benefits if they were to retire today.

Figure 1 below shows years of service for the active lump-sum and defined-contribution plan members.

Figure 1: Years of Service for Active Members – 2013

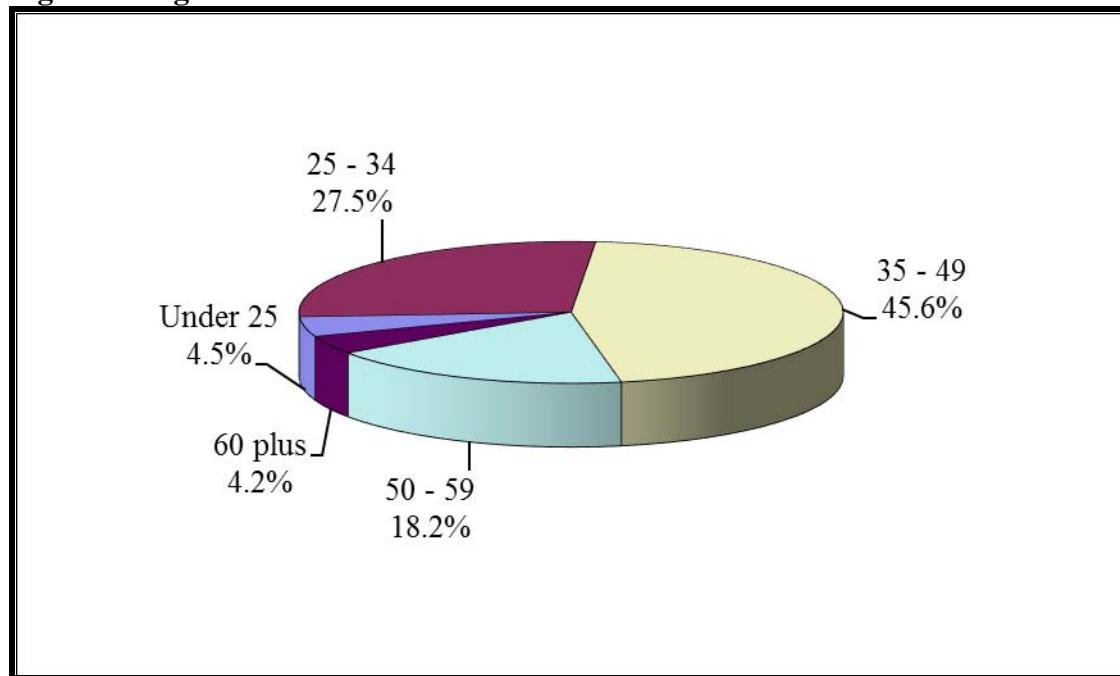

² Lump-sum and defined-contribution plans submit reporting forms to the Office of the State Auditor that contain membership information. Monthly and monthly/lump-sum combination plans are not required to provide the same membership data.

A member's age and length of time until retirement are important considerations when setting benefit levels and formulating investment strategies. The largest age demographic was between 35 and 49, which represented 45.6 percent of all active relief association members. In 2013, 18.2 percent of active members were between 50 and 59, and 4.2 percent were age 60 or over. Given that the minimum statutory age for retirement is 50 years, 22.4 percent of active members have already met this requirement. As the population of active members continues to age, relief associations could see an increase in the number and frequency of retirements. Therefore, recruitment and retention become important considerations for relief associations and their affiliated fire departments.

Figure 2 below shows age ranges of the active lump-sum and defined-contribution plan members.

Figure 2: Age of Active Members – 2013

Deferred members are members who have separated from active service and are vested, but have not yet met the minimum retirement age to receive a service pension or have not yet requested payment of a service pension. Of the deferred members, 20.3 percent have served for 20 or more years. Deferred members who are partially vested (have less than 20 years of service) receive a reduced benefit upon retirement based upon the relief association's bylaws.

The largest demographic of deferred members was between 35 and 49, which accounts for 67.1 percent of all deferred members.

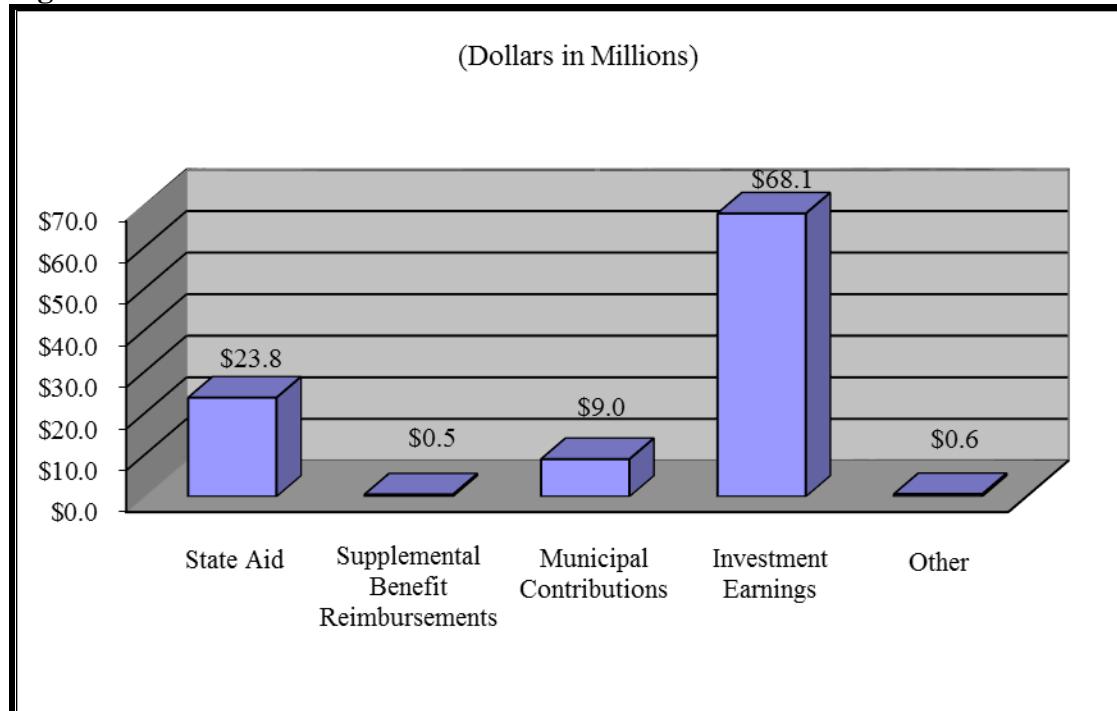

Revenues

For the purposes of this report, relief association revenues are summarized into five categories. The primary sources of revenue for relief associations are fire state aid, municipal contributions, and investment earnings. Relief associations also receive revenue in the form of reimbursements for supplemental benefits paid and other income, such as donations and transfers.

In 2013, relief association revenues totaled \$102.0 million, an increase compared to the \$70.2 million in 2012. The significant rise in total revenues was primarily due to investment gains totaling \$68.1 million in 2013, compared to \$42.5 million in investment gains during 2012.

Figure 3 below illustrates the revenue sources for relief associations during 2013.

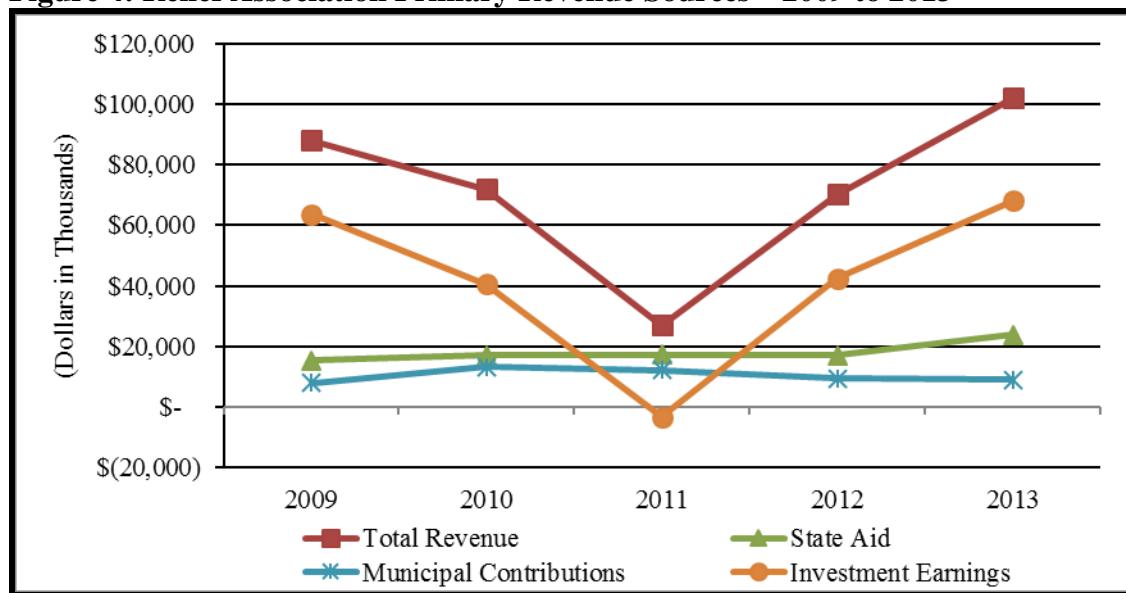

Figure 3: Relief Association Revenue Sources – 2013

State aid accounted for \$23.8 million of relief association revenue. Municipal contributions totaled \$9.0 million. Relief associations also received \$540,349 from supplemental benefit reimbursements and \$586,286 from other sources of income.

Figure 4 below illustrates the primary revenue sources for relief associations from 2009 to 2013. Over this five-year period, state aid and municipal contributions remained fairly stable. Investment earnings fluctuated considerably over this time period and had the greatest impact on total relief association revenues. Investment earnings trended downward during 2010 and 2011 correlating to the decline in the financial markets with a recovery occurring during 2012 and continuing upward to 2013. The 2013 investment earnings amount was the largest amount during this five-year period, which is important to note considering there were fewer relief associations in existence in 2013 than in the prior years.

Figure 4: Relief Association Primary Revenue Sources – 2009 to 2013

Tables 2-A, 2-B, and 2-C on pages 37 through 57 show the net asset value for each relief association at the end of 2013 and the ranking by net assets relative to other associations of the same plan type.

State Aid

Fire state aid is derived from a two-percent state tax on insurance premiums and is allocated based on the market value of real property in the fire district and on the population of each fire district. An additional allocation is given to relief associations with small numbers of active members to maintain a minimum amount of aid. When firefighters are covered by a pension plan, state law requires that fire state aid be used for pension purposes.

A new supplemental state aid program was established during the 2013 legislative session to provide additional funding for fire and police retirement plans. Beginning with 2013 state aid distributions, the State of Minnesota is appropriating \$15.5 million annually to the new aid program. Of this appropriation, about \$5.5 million is allocated annually for

volunteer fire relief associations and for volunteer firefighters covered by the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan administered by the Public Employees Retirement Association (PERA). The remainder is allocated to the PERA police and fire fund and the state patrol plan administered by the Minnesota State Retirement System. The supplemental state aid program will automatically terminate once the funding ratio of the PERA police and fire fund or the state patrol plan equals or exceeds 90 percent, whichever occurs last.

Volunteer fire relief associations received a total of \$23.8 million in state aid during 2013, a 39.2 percent increase from the \$17.1 million received in 2012. The increase in the total state aid shown in this report is largely due to the supplemental state aid program established during 2013 described above.

On average, relief associations each received \$36,570 in state aid, representing a 44.7 percent increase from the 2012 average of \$25,267. Only 22.9 percent of relief associations received a state aid amount that was greater than the 2013 average. The average state aid amount for the 543 lump-sum plans included in this report was \$29,600. The \$16.1 million received by lump-sum plans made up 67.5 percent of the total state aid disbursed to relief associations. Defined-contribution plans received a total of \$4.1 million in state aid, with an average of \$47,822. Monthly and monthly/lump-sum combination plans received \$3.7 million in state aid and averaged \$159,541 per plan. This higher average of state aid for the monthly and monthly/lump-sum combination plans is due to their concentration in the seven-county Metro Area. Many of these communities have relatively large populations and relatively high property values, the two factors on which the aid allocation is based.

The largest single disbursement of state aid was made to the Plymouth Fire Relief Association, which received \$449,270. The Eden Prairie and Maple Grove Fire Relief Associations received \$416,299 and \$379,143, respectively. Of the ten relief associations that received over \$300,000 in state aid, the only lump-sum plans were Lakeville and Woodbury.

State aid amounts varied by region due to variation in property values and the difference in population within the fire service areas. The 89 relief associations in the Metro Area accounted for \$10.9 million, or 46.0 percent, of the total state aid disbursed. The average amount received by these 89 relief associations was \$122,952, an increase from the 2012 average of \$89,110. The 112 relief associations in Greater Minnesota affiliated with municipalities having populations over 2,500 received \$6.1 million in state aid. The relief associations received an average of \$54,030 in state aid. Finally, the 450 relief associations in Greater Minnesota affiliated with municipalities having populations under 2,500 received a total of \$6.8 million in state aid, with an average amount of \$15,140.

Tables 2-A, 2-B, and 2-C on pages 35 through 57 show the 2013 state aid received by each relief association and the ranking by amount of state aid relative to other associations of the same plan type.

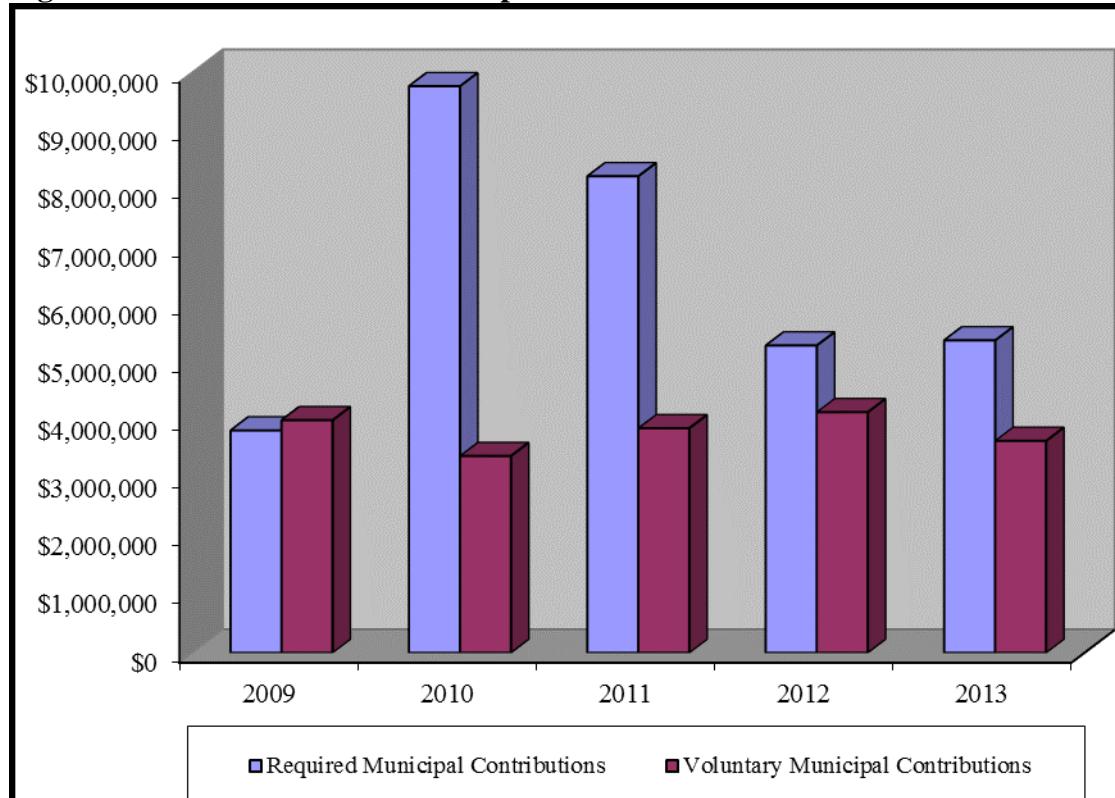

Municipal Contributions

Municipal contributions are contributions to relief associations from cities, towns, and independent nonprofit firefighting corporations. When a municipality approves a relief association's benefit level, the municipality assumes responsibility for ensuring that the relief association Special Fund has sufficient assets to cover the approved benefit levels. Contributions may be required by law based, in part, on a relief association's finances, or may be made voluntarily by a local municipality.

Relief associations received \$9.0 million in municipal contributions, a 4.3 percent decrease from the \$9.4 million contributed in 2012. Of the \$9.0 million received, \$5.4 million, or 60.0 percent, was required by statute to be contributed. The \$5.4 million in required municipal contributions is an increase of 1.9 percent from the \$5.3 million required for 2012. The required municipal contributions were mostly due to investment losses experienced during the financial market downturn. As the markets improve, the total required municipal contributions should decrease.

Figure 5 below shows the total municipal contributions received by relief associations from 2009 to 2013, and illustrates the amounts required by statute to be contributed and the amounts contributed voluntarily.

Figure 5: Relief Association Municipal Contributions – 2009 to 2013

The Eden Prairie Fire Relief Association received the largest municipal contribution, at \$582,972. The Apple Valley Fire Relief Association received the next highest municipal contribution, at \$303,591. The average municipal contribution for those relief associations that received one was \$20,969. This is a 1.3 percent increase from the 2012 average of \$20,707.

Municipal contributions as a percentage of a relief association's assets varied significantly. The Makinen Fire Relief Association's municipal contribution of \$7,535 made up 26.5 percent of its net assets. Makinen had the second-lowest funding ratio of all relief associations at the end of 2013 at 66.9 percent. The Keewatin Fire Relief Association's municipal contribution of \$21,776 made up 12.5 percent of its net assets. In contrast, the large municipal contribution that the Eden Prairie Fire Relief Association received accounted for only 2.9 percent of its net assets.

Lump-sum plans received \$5.2 million in municipal contributions, a 5.5 percent decrease from the \$5.5 million received in 2012. Of the \$5.2 million in municipal contributions made to lump-sum plans, 62.4 percent was required to be contributed. During 2013, 67.2 percent of lump-sum relief associations received a contribution. The Rosemount Fire Relief Association received \$171,000, the largest municipal contribution among lump-sum plans. The Alexandria, Farmington, Marshall, and Shakopee Fire Relief Associations also received municipal contributions that exceeded \$100,000. The average municipal contribution among lump-sum plans that received one was \$14,335.

Required municipal contributions for monthly and monthly/lump-sum combination plans are calculated by an actuary retained by the relief association, using a statutory formula that is different than the statutory formula that is used for lump-sum plans. Monthly and monthly/lump-sum plans received \$2.6 million in municipal contributions, which was nearly identical to the amount received in 2012. Nineteen of the 23 monthly and monthly/lump-sum combination plans received a municipal contribution during 2013, averaging \$137,435 per contribution. Typically, monthly and monthly/lump-sum plans have higher municipal contribution amounts as these plans are impacted by the ongoing liabilities of their retired members.

Defined-contribution plans by their nature are fully funded because their assets are always equal to their liabilities. All assets are divided among the plan members, and the value of each member's account rises or falls based on revenues and expenditures to or from the plan. As a result, defined-contribution plans do not require contributions from their affiliated municipality, and any municipal contributions made to a defined-contribution plan are made on a voluntary basis by the municipality.

Total municipal contributions made to defined-contribution plans were \$1.2 million, a 7.7 percent decrease from the \$1.3 million received in 2012. During 2013, 55.3 percent of defined-contribution plans received a municipal contribution, with an average of \$25,402 for those that received one. The overall average size of each municipal contribution was influenced by the larger municipal contributions to the Eagan, Maple Grove, and West Metro Fire Relief Associations, which were \$297,339, \$213,516, and \$194,022,

respectively. The largest municipal contribution of the remaining defined-contribution plans was \$67,160, received by the Mendota Heights Fire Relief Association.

Municipal contribution amounts, like state aid amounts, varied by region. Relief associations in the Metro Area received \$4.8 million in municipal contributions, which made up 53.1 percent of the total municipal contributions received. Metro Area relief associations accounted for over one-half of all municipal contributions received, even though they make up only 13.7 percent of relief associations included in this report. The average municipal contribution was \$70,592 for Metro Area plans that received one.

Relief associations affiliated with Greater Minnesota municipalities with a population over 2,500 received \$2.0 million in municipal contributions, accounting for 22.6 percent of all municipal contributions received. The average municipal contribution for these relief associations was \$21,937.

Relief associations affiliated with Greater Minnesota municipalities with a population under 2,500 received \$2.2 million in municipal contributions, which is 24.3 percent of all municipal contributions received. Of these relief associations, 60.0 percent received a municipal contribution, with the average contribution being \$8,137.

Tables 2-A, 2-B, and 2-C on pages 35 through 57 show the 2013 municipal contribution received by each relief association and the ranking by amount of municipal contributions received relative to other relief associations of the same plan type.

Investment Earnings

Investment returns generally improved in 2013, reaching the highest overall level since 2009. Domestic stock and international stock were the top-performing asset classes in 2013. Bonds produced a negative overall return.

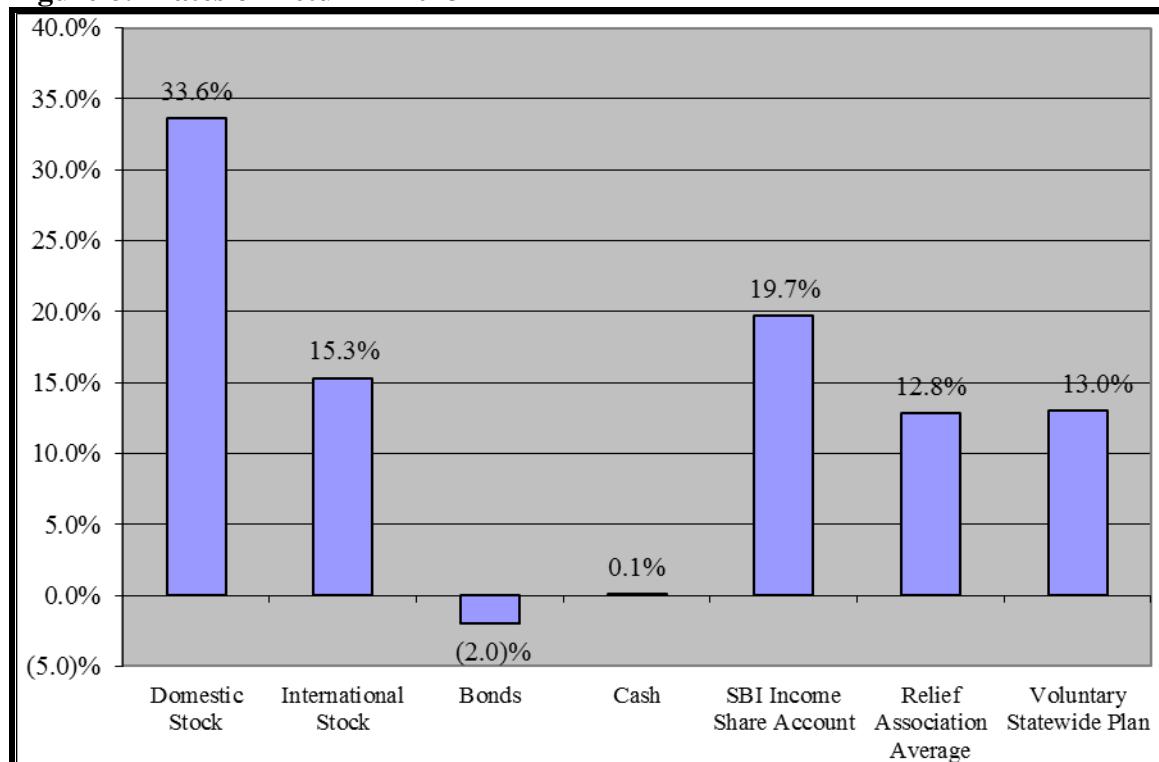

For the year, domestic stock, as measured by the Russell 3000 Index, returned 33.6 percent. International stock returned 15.3 percent, as measured by the Morgan Stanley Capital International (MSCI) All-Country World Index excluding the United States (ACWI ex. U.S.). Bonds returned negative 2.0 percent, as measured by the Barclays Capital Aggregate Index. Cash returned 0.1 percent, as measured by the 90-Day U.S. Treasury Bill.

The average asset allocation for relief associations was 47.9 percent domestic stock, 10.5 percent international stock, 19.2 percent domestic bonds, 5.1 percent international bonds, 15.9 percent cash, and 1.4 percent other investments. Compared to the averages from 2012, domestic stock allocations increased by 4.1 percent, international stock increased by 0.1 percent, international bonds increased by 1.0 percent, while domestic bonds decreased by 2.7 percent, cash decreased by 2.4 percent, and other investments decreased by 0.1 percent. Of the relief associations included in this report, 20.4 percent held at least one-half of their assets with the State Board of Investment (SBI). The average rate of return for these relief associations was 19.6 percent. There were 10.1

percent of relief associations solely invested in cash that had an average rate of return of 1.7 percent.

Figure 6 below shows the 2013 rates of return for domestic stock, international stock, bond, and cash markets. The 2013 rate of return for the SBI Income Share Account, the relief association average rate of return, and the 2013 rate of return for the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan are included for comparison purposes.

Figure 6: Rates of Return – 2013

Current Trends

Relief associations had investment gains of \$68.1 million in 2013. Lump-sum plans accounted for \$39.0 million, or 57.3 percent of the total investment gains. Investment earnings for the 85 defined-contribution plans totaled \$14.2 million, which made up 20.9 percent of total investment gains. Monthly and monthly/lump-sum combination plans earned \$14.9 million, accounting for just under 21.9 percent of total investment gains.

In 2013, relief associations averaged a 12.8 percent rate of return. Investment returns increased from the 8.5 percent average rate of return in 2012. The Lake Kabetogama Fire Relief Association had the highest rate of return, at 35.9 percent. The Schroeder Fire Relief Association returned 35.3 percent, while the Hayward Fire Relief Association returned 32.8 percent. It is interesting to note that the three relief associations with the highest rates of return were all relief associations affiliated with Greater Minnesota municipalities having a population under 2,500.

The Plato Fire Relief Association had the lowest rate of return, at negative 6.8 percent. The Flensburg Fire Relief Association returned negative 3.4 percent, while the Oklee Fire Relief Association returned negative 1.5 percent in 2013.

The Waconia Fire Relief Association had the highest rate of return among the 89 relief associations in the Metro Area, returning 28.3 percent. The Brooklyn Park, Columbia Heights, Randolph, and Robbinsdale Fire Relief Associations also had returns exceeding 23.0 percent. All of the plans that returned over 23.0 percent in the Metro Area had diversified portfolios, with each investing over 89.0 percent of their assets with the State Board of Investment. The Linwood Fire Relief Association returned negative 0.8 percent for the year, the lowest return of the Metro Area relief associations.

Among the 112 relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, the Isanti Fire Relief Association had the highest rate of return at 29.3 percent. The Owatonna and Northfield Fire Relief Associations returned 29.2 percent and 27.6 percent, respectively. The Sleepy Eye Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, returning 0.2 percent.

The Lake Kabetogama Fire Relief Association had the highest rate of return among the 450 relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, with a return of 35.9 percent. The Plato Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, returning negative 6.8 percent.

Legislation passed by the 2009 Minnesota Legislature created the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan (Plan). Thirteen relief associations transferred their assets to the Plan in December 2013, bringing the total to 76 relief associations that have joined the Plan as of January 1, 2014. Each entity in the Plan has its own separate account, but assets are pooled for investment purposes. The Plan investments are managed by the SBI and have a long-term expected return of six percent. The Plan returned 13.0 percent for 2013. The 2013 asset allocation of the Plan is provided in Table 7 on page 153.

Benchmarks

The Office of the State Auditor calculates a custom benchmark rate of return for each relief association. Benchmarks serve as a standard against which investment performance can be measured. The benchmark return is the return of a hypothetical portfolio of indices, invested in similar asset classes and in the same proportions as the relief association was invested in at the beginning of 2013. The actual asset allocations at the beginning of the year were used to calculate the custom benchmark rate of return since many relief associations do not have target asset allocations in their investment policies. The benchmark return is not a perfect measure of the plan's performance, but it is a good indicator of the returns available to the relief association during the year.

Table 8 of this report lists each relief association, its custom benchmark, and its 2013 rate of return. Although the indices used to calculate the benchmarks cannot be invested in directly, investments such as mutual funds and exchange traded funds that closely track most indices are widely available. These types of investments are a way for relief associations to invest in the markets as a whole.

The following indices and their respective rates of return are used to calculate the Table 8 benchmarks for each relief association on page 179:

Asset Class	Benchmark	2013 Return
Domestic Stock	Russell 3000	33.6%
International Stock	MSCI ACWI ex. U.S.	15.3%
Bonds	Barclays Capital Aggregate	(2.0)%
Cash	90-Day U.S. Treasury Bill	0.1%
Other	Russell 3000	33.6%

The Storden Fire Relief Association exceeded its custom benchmark by 10.3 percent, the highest margin among all relief associations. The Bertha and La Salle Fire Relief Associations both exceeded their benchmarks by 8.7 percent. Rates of return for 356 relief associations, or 54.7 percent, matched or exceeded their calculated custom benchmark rates of return. This is down from the 70.0 percent of relief associations that matched or exceeded their benchmark return in 2012. For 2013, 34.3 percent of relief associations missed their benchmark by one or more percent, an increase from the 20.4 percent that missed their benchmark by one or more percent in 2012. The Plato Fire Relief Association missed its respective benchmark by 24.6 percent, the largest deviation among all relief associations.

Long-Term Trends

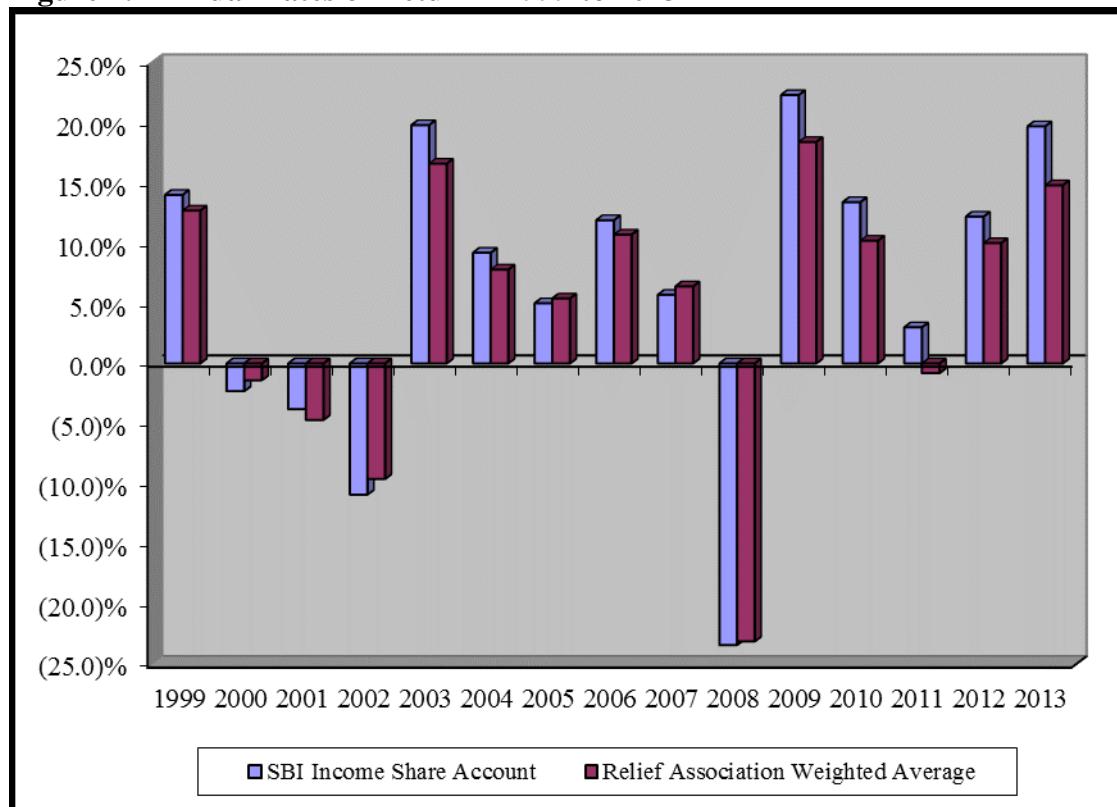

The last fifteen years in the markets have been a period of volatility. The U.S. stock market, as measured by the Russell 3000 Index, returned 5.3 percent over the fifteen-year period. The average bond market return over the fifteen-year period was 5.3 percent, as measured by the Barclays Capital Aggregate Index. During this fifteen-year period, the average annual relief association return was 4.3 percent, below the statutory interest rate assumption of five percent. Only 120 of the 633 relief associations in existence for the full period and included in this report had a fifteen-year average annual rate of return of at least five percent. Not keeping up with interest rate assumptions may harm the financial health of the relief association and could result in diminished benefit increases or larger required municipal contributions.

The Wanamingo Fire Relief Association was the highest-returning relief association over the fifteen-year period, with an average annual return of 7.2 percent. The Jordan Fire Relief Association had the lowest average annual rate of return over the fifteen-year period, at negative 0.8 percent.

The SBI Income Share Account provides a good example of returns that were available over the fifteen-year period ending December 31, 2013 (see Table 8). This account had an average annual return over the fifteen-year period of 5.7 percent. For the relief associations in existence for the entire fifteen-year period, 40 plans had a rate of return that was equal to or greater than the SBI Income Share Account. The average annual return for the SBI Income Share Account ranked in the 94th percentile for the fifteen-year period.

Figure 7 below shows relief association weighted average rates of return from 1999 to 2013 and the annual rates of return of the SBI Income Share Account.

Figure 7: Annual Rates of Return – 1999 to 2013

The ten-year period ending in 2013 contained eight years of positive returns for the relief association weighted average. The average annual relief association rate of return over the last ten years was 5.4 percent, just slightly above the statutory interest rate assumption of five percent. Less than half, or 47.5 percent, of the relief associations in existence for the full ten-year period had a ten-year average annual rate of return of at least five percent. The SBI Income Share account had an average annual return of 7.1 percent over the ten-year period. Forty of the 642 relief associations in existence for the full period had a rate of return that was equal to or greater than the SBI Income Share Account.

The Saint Martin Fire Relief Association had the highest average annual rate of return over the ten-year period, at 9.2 percent. The Ellendale Fire Relief Association was the

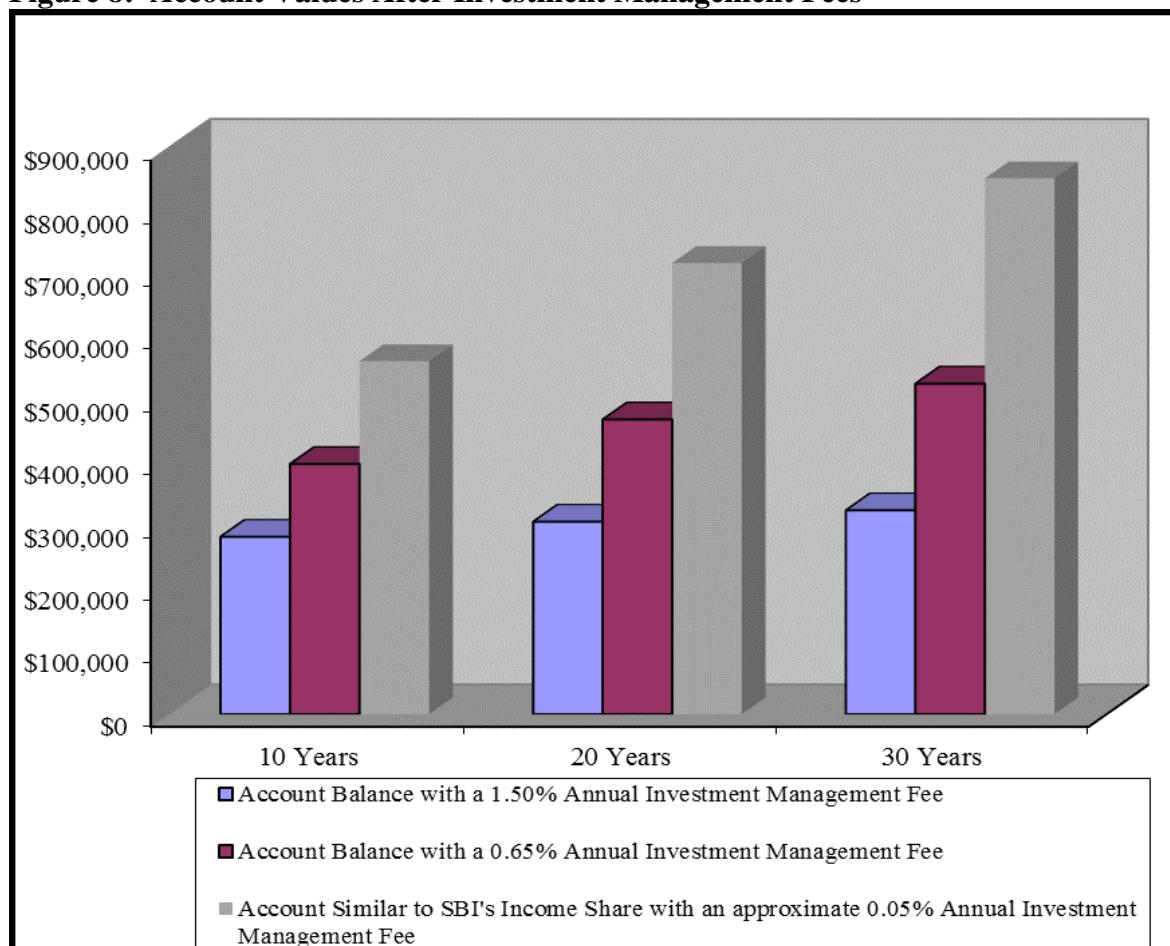

lowest-returning relief association over the ten-year period, with an average annual return of negative 0.3 percent.

Investment Management Fees

Financial institutions charge different types of fees for managing investment accounts. It is important for relief associations to understand the fees charged. Fees can reduce earnings and lower account balances over time.

Figure 8 below compares the impact various fee scenarios can have on the performance of a relief association's investment account over time.³ Higher fees can have a significant impact on a relief association's earnings and reduce the value of its account over time.

Figure 8: Account Values After Investment Management Fees

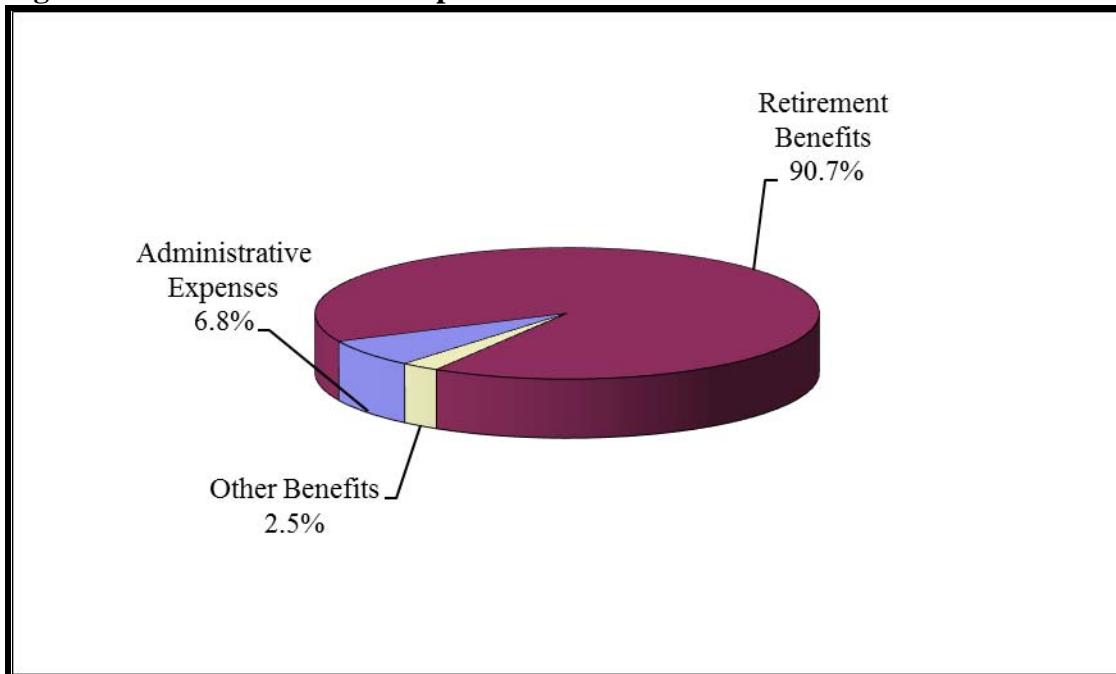

³ This is a hypothetical example for illustrative purposes only and not indicative of any investment plan. The figure assumes an account with a beginning balance of \$200,000, an annual rate of return of 5.0 percent, and no withdrawals. Actual rates of return may vary and will depend on a number of different factors, including a relief association's choice of investment options.

Expenditures

The primary expenditures for relief associations are service pension (retirement) benefit payments, administrative expenses, and other benefit payments. Total expenditures for relief associations in 2013 were \$32.1 million, which is a 2.1 percent decrease from the 2012 total of \$32.8 million.

Figure 9: Relief Association Expenditures – 2013

Benefit Payments

Relief associations exist to pay retirement, survivor, and disability benefits to members and their beneficiaries. These benefits compensate volunteer firefighters for their service to the community and assist in the recruitment and retention of volunteers. A total of \$29.1 million in service pensions was paid out by 373 different relief associations, a 2.7 percent decrease from the \$29.9 million paid in 2012. The Eden Prairie Fire Relief Association paid \$1,103,741 in service pensions during 2013, the largest total expenditure for service pensions among all relief associations.

Nearly 83 percent of relief associations in Minnesota are lump-sum plans, meaning that they pay benefits as a one-time lump-sum payment to members upon their retirement. Lump-sum plans paid a total of \$17.5 million in service pensions.

Defined-contribution plans are similar to lump-sum plans in that members receive a one-time lump-sum payment when they retire. The 85 defined-contribution plans paid a total of \$5.4 million in service pensions.

In 2013, only 23, or 3.5 percent, of relief associations offered monthly benefits to retirees. Of these relief associations, 20 provided their members with a choice at retirement of receiving a monthly benefit or a lump-sum benefit. Three relief associations provided only monthly benefits to their members. The monthly and monthly/lump-sum combination plans paid \$6.2 million in service pensions.

Other benefits, such as disability and survivor benefit payments, totaled \$788,237, a 9.0 percent increase from the 2012 total of \$722,901. Other benefit payments were paid to members and their beneficiaries by 31 different relief associations. Lump-sum plans paid a total of \$415,973 in other benefit payments. Defined-contribution plans paid a total of \$364,491 in other benefit payments, while monthly and monthly/lump-sum combination plans paid a total of \$7,773.

Administrative Expenses

A relief association's Special Fund is a restricted fund that receives state aid and municipal contributions and is used to pay for pensions and other benefits. Disbursements from a Special Fund may be made only for purposes expressly authorized under state law. Relief associations are authorized to use Special Fund assets to pay certain administrative expenses. Administrative expenses include audit, actuarial and legal fees, office expenses, fidelity bond expenses, officer salaries, and training fees.

In 2013, administrative expenses totaled \$2.2 million, a 4.8 percent increase from the \$2.1 million of administrative expenses in 2012. In 2013, there were 110 relief associations that did not use Special Fund assets to pay administrative expenses.

Professional fees, which include audit, actuarial, and legal fees, accounted for the largest portion of administrative expenses. Professional fees totaled \$1.5 million, or 68.2 percent, of all administrative expenses. The \$1.5 million spent on professional fees is a 7.1 percent increase from the \$1.4 million spent in 2012.

Relief associations spent \$535,945 on officer salaries, which was a 2.6 percent increase from the 2012 amount of \$522,467. Only 283 relief associations, or 43.5 percent, paid officer salaries from the Special Fund. Six relief associations reported total salary disbursements from the Special Fund of more than \$10,000. The average total salary disbursement for the 64 relief associations in the Metro Area that used Special Fund assets to pay officer salaries was \$4,577. The Edina Fire Relief Association had the largest total salary disbursement of relief associations in the Metro Area, at \$24,221.

Only 33.6 percent of relief associations affiliated with Greater Minnesota municipalities having a population under 2,500 used Special Fund assets to pay officer salaries, with an average total disbursement of \$767. The Biwabik City Fire Relief Association had the largest total salary disbursement for relief associations in this category, at \$4,320.

Nearly 61.0 percent of relief associations affiliated with Greater Minnesota municipalities having a population over 2,500 paid officer salaries from the Special Fund, with the average total disbursement at \$1,870. The Becker Fire Relief Association had the largest total salary disbursement of these relief associations, at \$7,650.

Tables 4-A, 4-B, and 4-C on pages 79 through 101 show the 2013 administrative expenses for each relief association.

Health of the Plans

Funding Ratios

Funding ratios are an important measure in assessing the financial health of a relief association. Funding ratios show the relationship between a relief association's assets and its liabilities.

The average funding ratio for lump-sum plans was 218.9 percent, an increase from the 2012 average of 204.9 percent. The lump-sum average is skewed by two exceptionally high funding ratios for recently-incorporated relief associations. Excluding the funding ratios of these two recently-incorporated relief associations, the lump-sum average drops to 130.3 percent. The median also presents a more accurate picture of the funding of lump-sum plans. The median funding ratio was 119.9 percent, compared to 108.0 percent in 2012. This means that one-half of the lump-sum plans had a funding ratio above 119.9 percent, while one-half of the plans were below 119.9 percent. Monthly and monthly/lump-sum combination plans had an average funding ratio of 99.2 percent. Defined-contribution plans are always 100.0 percent funded, as the liabilities are limited to the total plan assets.

Relief association funding ratios increased as asset values increased due to investment gains and greater state aid amounts. The effect was a decrease in the number of relief associations that had deficits (funding ratios below 100.0 percent). At the end of 2013, 77 relief associations, or 11.8 percent, had a deficit, compared to 172 relief associations in 2012. Also, the number of relief associations with funding ratios below 75.0 percent decreased from ten in 2012 to four in 2013. The Rollingstone Fire Relief Association had the lowest funding ratio, at 65.4 percent.

While low funding ratios often trigger greater required municipal contributions, extremely high funding ratios can pose problems as well. Extremely high funding ratios signal that a relief association's assets are significantly higher than its liabilities. Because a relief association's benefit level has a direct impact on its accrued liability, a high funding ratio suggests that the benefit level is low compared to the relief association's assets. Relief associations with excessively high funding ratios may be shortchanging current retiring members. It is normal for funding ratios of recently-incorporated relief associations to be high.

Extremely high funding ratios or funding ratios of less than 100.0 percent may be hard to maintain consistently over time. For under-funded relief associations, continued large required municipal contributions may cause municipalities to become less willing to approve future benefit increase requests. In the case of over-funded relief associations, future benefit increases may be viewed as unfair to retired members who provided service for years when the plan was over-funded. Maintaining a steady funding ratio

over time ensures that all retiring members of the relief association receive an equitable pension benefit.

Tables 3-A, 3-B, and 3-C on pages 61 through 75 show funding ratios for each relief association.

Benefit Levels

Benefit levels vary greatly among relief associations in Minnesota. Typically, relief associations with more assets are able to offer higher benefits to their members. The average benefit level for lump-sum plans was \$1,478, a 3.3 percent increase from the 2012 average of \$1,431. Only 34.1 percent of lump-sum plans offered a benefit level higher than the 2013 average of \$1,478.

The maximum lump-sum benefit level allowed under state law for 2013 was \$10,000 per year of service. Both the Northfield and Shakopee Fire Relief Associations offered a \$7,500 benefit level. A member who retired after serving for 20 years with either of these relief associations would receive a \$150,000 lump-sum benefit.

The Hollandale Fire Relief Association, a newer plan, had a benefit level of \$1 per year of service. The Brownsville, Kerrick, and Nerstrand Fire Relief Associations all offered a benefit level of \$50 per year of service.

For monthly/lump-sum combination plans, the average lump-sum benefit level was \$4,724. The Brooklyn Center, Plymouth, and Robbinsdale Fire Relief Associations offered the largest lump-sum benefits of the combination plans, all at \$7,500 per year of service. The monthly component of the monthly/lump-sum combination plans had an average benefit of \$25. The Eden Prairie and Minnetonka Fire Relief Associations offered the highest monthly benefit levels of the combination plans, at \$56 and about \$53 per year of service, respectively. A 20-year retiring member from the Eden Prairie Fire Relief Association who chooses the monthly option would receive \$1,120 every month after retirement for the remainder of the member's life.

The average monthly benefit for the three relief associations that offer only monthly benefits was \$20 per year of service. The Spring Lake Park Fire Relief Association offered the highest monthly benefit of this group, at \$36. The lowest monthly benefit was offered by the Pine City Fire Relief Association, at just over \$9 per year of service.

During 2013, 24.5 percent of the defined-benefit plans that offer a yearly benefit increased their benefit level. The Maplewood Fire Relief Association had the largest benefit increase, increasing its benefit level by \$700 per year of service. Maplewood was 136.3 percent funded after implementing the increase. The Elko New Market and Hamel Fire Relief Associations increased their benefit levels by \$600 and \$550 per year of service, respectively, and also were fully funded after implementing their increases. Of the 138 plans that increased their benefit level, 16 were less than fully funded at the end of 2013.

The Morse-Fall Lake Fire Relief Association had the largest percentage benefit increase at 900.0 percent, increasing its benefit level from \$10 to \$100 per year of service. The Colvin, Culver, Holland, Porter, and Wright Fire Relief Associations each increased their benefit levels by 50.0 percent or more. Of the relief associations that increased their benefit level, 79, or 57.2 percent, had an increase of ten percent or less.

One relief association decreased its benefit level during 2013. The Cook Fire Relief Association lowered its benefit level from \$1,500 to \$1,250 per year of service. Cook ended 2013 at 128.8 percent funded after implementing the benefit decrease.

Regional Analysis

Thirteen economic development regions were established by the Minnesota Legislature. For the reader's convenience, relief association data is summarized by economic development region and analyzed for regional trends.

Current Trends

In 2013, the Metro Area region continued to have the highest average lump-sum benefit level, at \$4,005 per year of service, an increase of 4.1 percent over the 2012 average of \$3,848 per year of service. The Central and North Central regions followed, with average benefit levels of \$1,840 and \$1,653 per year of service, respectively. The Upper Southwest region had the lowest average benefit level, at \$840 per year of service. The Upper Southwest region's average of \$840 per year of service was a 2.2 percent increase from the 2012 average of \$822 per year of service. The North Central region had an average benefit level of \$1,653 per year of service, which was a 7.1 percent increase over the 2012 average benefit level of \$1,544 per year of service, the highest percentage increase of the regions.

The Southeast region had the highest average funding ratio for defined-benefit plans, at 748.9 percent. This was an increase from the 2012 average funding ratio of 627.8 percent for the Southeast region. The region's funding ratio is skewed by the Hollandale Fire Relief Association's high funding ratio, which was recently incorporated and had a benefit level of \$1. Excluding the Hollandale Fire Relief Association, the Southeast region's average funding ratio was 148.2 percent. The Arrowhead region had an average funding ratio of 157.7 percent. The Southwest Central region had the lowest average funding ratio, at 112.2 percent. The Metro Area region's average funding ratio of 114.6 percent was an 11.4 percent increase from its 2012 average of 102.9 percent, which had been the lowest average funding ratio in 2012.

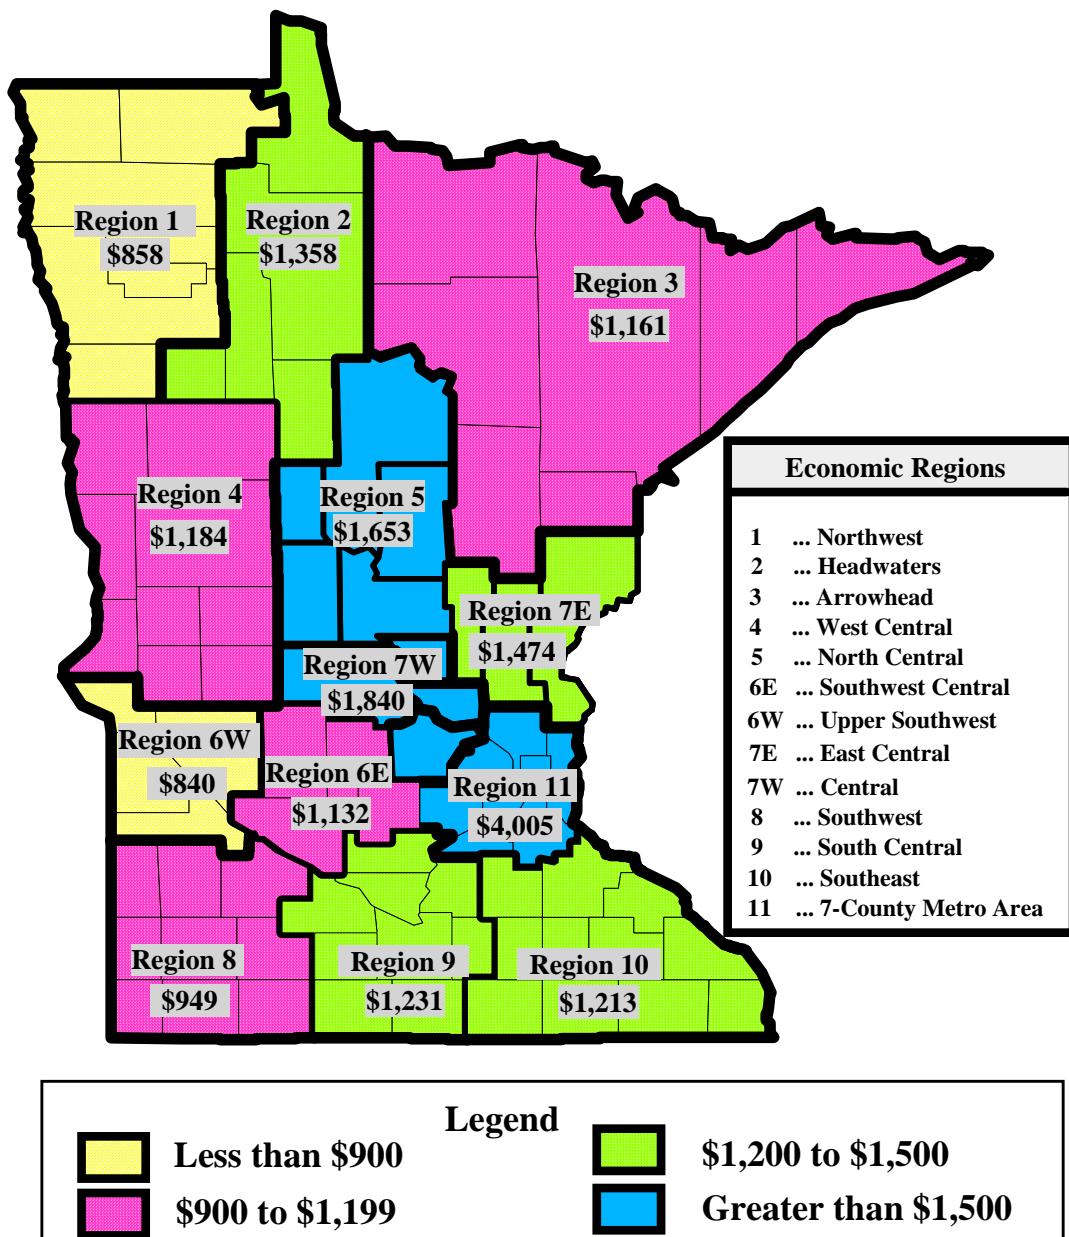

Five regions had average rates of return exceeding the overall relief association average rate of return of 12.8 percent in 2013. The Upper Southwest region had the highest average rate of return, at 16.7 percent. The Metro Area region was close behind with an average rate of return of 15.3 percent. The Northwest region had the lowest average rate of return, at 9.5 percent. The Southwest region was the second lowest with an average rate of return of 9.8 percent.

Long-Term Trends

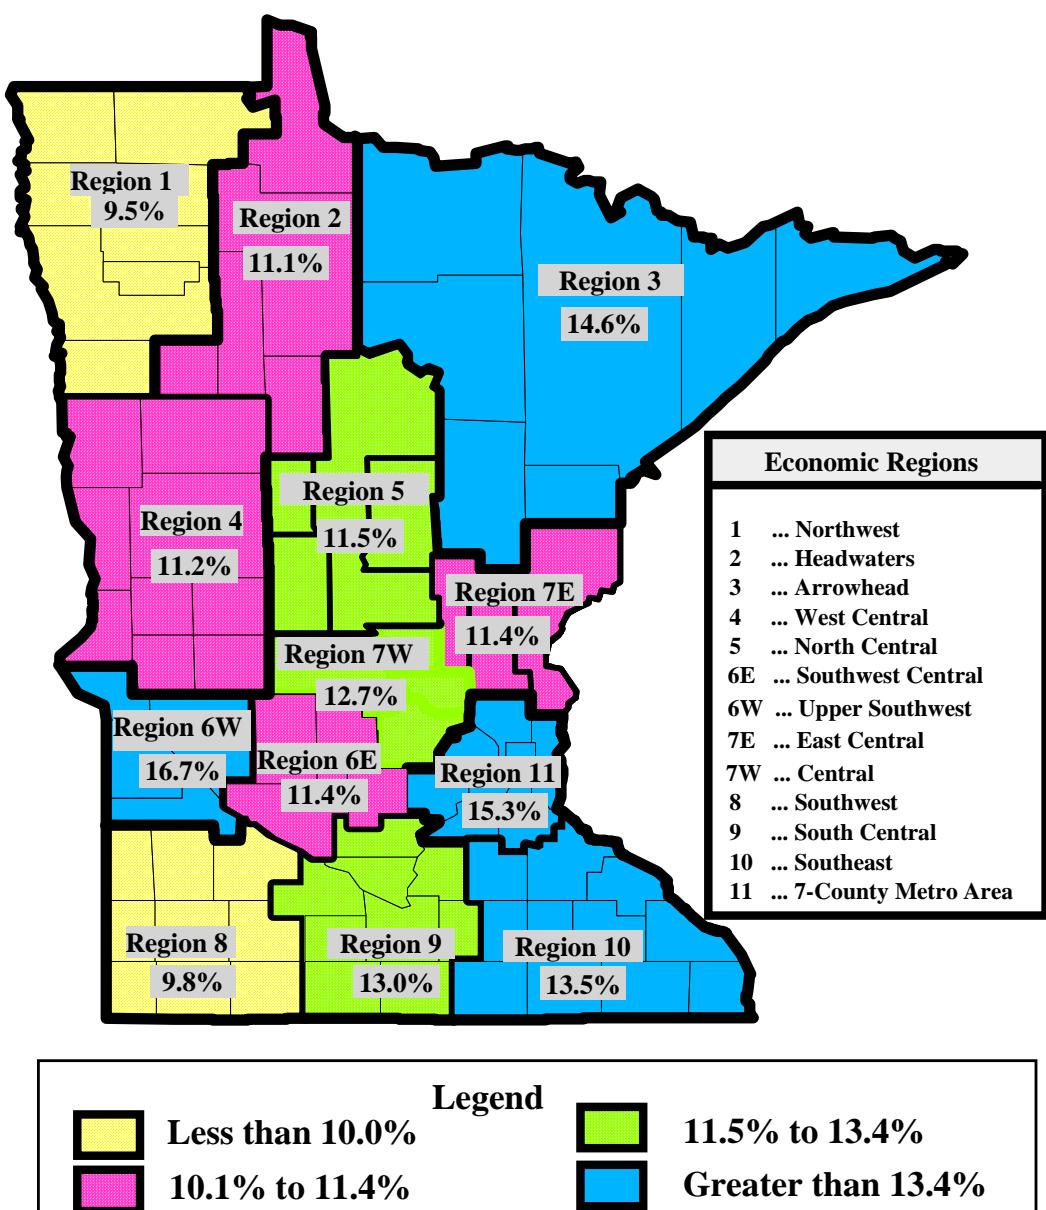

Relief associations in the Upper Southwest region had the highest fifteen-year average rates of return, at 4.3 percent. The Metro Area region had a fifteen-year average rate of return of 4.2 percent. The South Central, Southeast, and West Central regions all had fifteen-year average rates of return of 4.0 percent.

Statutory guidelines assume a rate of five-percent growth for relief associations. None of the 13 regions had fifteen-year average rates of return above five percent. The Northwest region had the lowest average rate of return over the fifteen-year period, at 3.4 percent. The East Central and Southwest Central regions both had average rates of return over the fifteen-year period of 3.5 percent.

How to Read Tables 2-A Through 2-C

Tables 2-A, 2-B, and 2-C provide relief association financial and investment data.

Active Members – Active relief association members as of December 31, 2013.

Net Assets – The value of the relief association's Special Fund assets as of the end of 2013. The net assets include any accounts payable or receivable that were outstanding as of December 31, 2013. The net asset value may therefore differ from the market value of the relief association's investments.

Rank (%-ile) – For Net Assets, and for each of the following categories, the relief association is ranked relative to the other associations of the same benefit type. A rank of 0 percent is the lowest, 100 percent the highest. For example, a fire state aid rank of 87 percent means that the relief association received a fire state aid amount higher than 87 percent of the associations of the same benefit type.

State Aid – The amount of fire state aid the relief association received during 2013, or payable for 2013 if not yet received.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2013, or payable for 2013 if not yet received.

Pension Amount – For lump-sum plans, the amount per year of service in effect at the end of 2013. A retiring firefighter from a lump-sum plan would receive a benefit equal to the pension amount multiplied by the completed years of active service. Benefits for members of a defined-contribution plan are equal to the member's account balance. Because the benefits for defined-contribution plan members are not based upon a per-year-of-service amount, there is no applicable pension amount.

Table 2-C provides both yearly and monthly benefit amounts. Members for most of the relief associations included in this table have the option of receiving either a lump-sum or a monthly benefit upon retirement. Benefits for members receiving a monthly pension are based on a monthly benefit amount which, when multiplied by the years of service, is the amount a retiring member would receive each month for the rest of his or her life. The yearly benefit amount is the amount per year of service in effect at the end of 2013 for members electing to receive their pension in a lump-sum payment.

All pension amounts are subject to reductions if the member had not served the required years of service for full vesting.

ROR 2013 – The rate of return earned on the relief association’s investments during 2013.

Funding Ratio – The relief association’s December 31, 2013 net assets divided by its accrued liabilities. Over 100 percent means the relief association has more assets than liabilities, while less than 100 percent means it has more projected liabilities than assets.

Table 2-A
Financial and Investment Data for Lump-Sum Plans
For the Year Ended December 31, 2013

How to Read Tables 3-A Through 3-C

Tables 3-A, 3-B, and 3-C provide relief association funding status and contribution requirement information.

Net Assets – The value of the relief association’s Special Fund assets as of the end of 2013. The net assets include any accounts payable or receivable that are outstanding as of December 31, 2013. The net asset value may therefore differ from the market value of the relief association’s investments.

Accrued Liabilities – An estimate of how much a relief association has accrued in pension benefits payable as of the end of 2013. The estimate is derived using statutory assumptions.

Surplus or (Deficit) – A surplus is the amount of a relief association’s net assets in excess of its accrued liabilities. A deficit is the amount of accrued liabilities a relief association had in excess of its assets as of December 31, 2013. A relief association that has a deficit is “under-funded,” while a relief association that has a surplus is “fully-funded.”

Funding Ratio – The relief association’s assets divided by its accrued liabilities at the end of 2013. Over 100 percent means the relief association had more assets than liabilities, while less than 100 percent means the association had more projected liabilities than assets.

Deficit Amortization Payment – Relief associations that showed a deficit on their 2013 Schedule Form or Actuarial Valuation are required to include this charge when calculating their required contribution. The amortization payment helps bring the relief association closer to full funding.

Normal Cost – The relief association’s cost of existing for one year; in this case, from 2013 to 2014. The normal cost includes the cost of members receiving one additional year of service credit, and becoming closer to receiving a fully-vested pension.

Required Contribution – The contribution required from the affiliated municipality or independent nonprofit firefighting corporation.

* For lump-sum plans, the Deficit Amortization Payment amounts are based on projected amounts as of August 1, 2013, as reported by relief associations on their 2013 Schedule Form.

^ For lump-sum plans, the Required Contribution is obtained from the 2013 Schedule Form and represents amounts to be contributed to the relief association during 2014.

** These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2014. The assets for these relief associations were transferred to the State Board of Investment and their liabilities were transferred to the Plan at the end of 2013.

* For monthly and monthly/lump-sum combination plans, the Deficit Amortization Payment amounts are obtained from actuarial valuations or actuarial estimates prepared according to the benefit provisions applicable on December 31, 2013.

^ For monthly and monthly/lump-sum combination plans, the Required Contribution is obtained from actuarial valuation statistics associated with the December 31, 2013, benefit level of the plan and represents an estimated required contribution for the next budget year. If an estimated required contribution is not provided in the actuarial valuation, it is calculated by reducing the total financial requirements as stated in the valuation by the estimated fire state aid.

This page is intentionally left blank.

How to Read Tables 4-A Through 4-C

Tables 4-A, 4-B, and 4-C provide relief association revenues and expenditures for 2013.

Revenues

State Aid – The amount of fire state aid the relief association received during 2013, or the amount payable for 2013 if not yet received.

Supplemental Benefit Reimbursements – The total amount received in reimbursements from the State of Minnesota for the mandatory additional 10 percent (up to \$1,000) payment for lump-sum service pensions and the optional 20 percent (up to \$2,000) payment for survivor benefits. Supplemental benefits are additional benefits that are paid at the time of the pension or benefit disbursement, and are meant to help offset state income taxes that must be paid on relief association benefits.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2013, or payable for 2013 if not yet received.

Investment Earnings – The net interest and realized and unrealized gain (loss) on investments during 2013.

All Other – All other income received by the relief association during 2013, which includes, but is not limited to, donations, transfers from the General Fund, and other income.

Expenditures

Administration – Expenses paid for items such as salaries, training, audit, actuarial and legal fees, and fidelity bonds. It also includes any other uncategorized expenditures.

Service Pensions – The total of all service pension disbursements during 2013, including lump-sum and monthly distributions.

Other Benefits – The total of all non-service pension benefit distributions during 2013, including short- and long-term disability payments and survivor benefits.

How to Read Tables 5-A Through 5-C

Tables 5-A, 5-B, and 5-C provide information regarding relief association membership and bylaw provisions in effect at the end of 2013.

Active Members – Active members in the relief association as of December 31, 2013.

Lump-Sum – Retirees who received a lump-sum pension during 2013.

Survivor – Survivor benefits paid during 2013.

Disability – Disability benefits paid during 2013.

Monthly – Retirees or beneficiaries receiving a monthly pension during 2013 (for “Other Plan Types” only).

Deferred Members – Members no longer active in the fire department or relief association who are entitled to, but have yet to receive, a service pension.

Minimum Retirement Age – The minimum age at which a member may receive a service pension distribution. State law requires that members be at least age 50 to receive payment of their service pension.

Active Service – The minimum years a member must serve with the affiliated fire department before becoming eligible for a service pension.

Active Membership – The minimum years a member must be a member of the relief association before becoming eligible for a service pension.

Treasurer – The amount of the treasurer’s faithful performance bond. By law, it must be 10 percent of assets, although the amount of the bond need not exceed \$500,000.

Secretary – The amount of the secretary’s faithful performance bond, if applicable. State law does not require that the secretary be bonded.

This page is intentionally left blank.

How to Read Tables 6-A Through 6-C

Tables 6-A, 6-B, and 6-C provide information regarding the benefits offered by each relief association during 2013.

Annual Benefit – The service pension amount payable per year of active service. For defined-contribution plans, the pension amount is based on the member's account balance.

Monthly – The service pension amount payable per month, for each year of active service.

Long-Term Disability – The amount and type of benefit available for members who separate from service with a long-term disability. “Y/S” means the amount paid per year of active service, while “M/S” means the amount paid monthly for each year of active service.

Short-Term Disability – The amount and type of benefit for members who are temporarily unable to serve because of a short-term disability.

Survivor Benefit – The amount and type of benefit paid on behalf of a deceased member. “Y/S” means the amount paid per year of active service, while “M/S” means the amount paid monthly for each year of active service.

How to Read Table 7

Table 7 provides relief association investment information.

Market Value – The value of the relief association’s Special Fund investments as of December 31, 2013.

% of Assets at SBI – Percentage of the relief association’s investments held in the State Board of Investment’s Supplemental Fund.

Allocations as of 12/31/13 – Percentage of the relief association’s investments that are held in each asset class. “Other” includes all investments besides cash, stocks, and bonds, including small allocations to this asset class within mutual funds.

This page is intentionally left blank.

* These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2014. The assets of these relief associations were transferred to the State Board of Investment at the end of 2013, so there were no market values or asset allocations for these associations.

This page is intentionally left blank.

How to Read Table 8

Table 8 provides relief association investment information.

Market Value – The value of the relief association’s Special Fund investments as of December 31, 2013.

% of Assets at SBI – Percentage of the relief association’s investments held in the State Board of Investment’s Supplemental Fund.

Rates of Return

2013 – The return on the relief association’s investments for calendar year 2013.

2013 Benchmark – The return on a hypothetical portfolio, explained in detail below.

Above (Below) Benchmark – The 2013 Return minus the Benchmark Return. This figure shows how the relief association performed compared to its benchmark.

5-Yr – The relief association’s average annual return from 2009-2013.

10-Yr – The relief association’s average annual return from 2004-2013.

15-Yr – The relief association’s average annual return from 1999-2013.

Rank (%-ile) 10-Yr Return – The relief association’s ranking by its ten-year return. The highest ten-year average annual return is ranked at 100 percent, while the lowest ten-year average annual return is ranked at 0 percent. For example, a 75 percent rank means the relief association’s average annual return is higher than the return earned by 75 percent of relief associations.

Benchmark Return

The benchmark return is included as a comparison tool for relief associations. The benchmark return shows what the relief association could have earned, had it invested its assets passively for the entire year. Passive investment means using index funds that track a specific index. Index funds are widely available for stocks and bonds. For cash, a relief association could have invested in a proven money market fund or shopped for the highest-returning certificates of deposit.

The benchmark return is calculated for each relief association by multiplying the association's asset class proportions by the rate of return earned on a common benchmark index for each asset class. If a relief association changed investment strategies during the year, the calculated benchmark return will not reflect the changes.

Benchmark Calculation Example

January 1, 2013 Asset Allocation		Benchmark	Return	(a) x (b)
	(a)		(b)	(c)
Domestic Stock	42.3%	Russell 3000	33.6%	14.2%
International Stock	9.8%	MSCI ACWI ex. U.S.	15.3%	1.5%
Bonds	25.3%	Barclays Capital Aggregate	(2.0)%	(0.5)%
Cash	21.0%	90-Day U.S. T-Bill	0.1%	0.0%
Other	1.6%	Russell 3000	33.6%	0.5%
Benchmark Return			Sum (c) =	15.7%

Common Benchmark Indices

Russell 3000 Index – A measure of the overall U.S. stock market. This index includes the 3,000 largest publicly traded U.S. companies.

MSCI ACWI ex. U.S. Index – A measure of the performance of international stocks, including developed markets and emerging markets. This index does not include the U.S. stock market's performance.

Barclays Capital Aggregate Index – A measure of the performance of the U.S. investment grade bond market, including corporate and government bonds.

90-Day U.S. T-Bill – A measure of short-term cash investments.

Legend

A = The relief associations and the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan did not exist for either the full five-year, ten-year, or fifteen-year period during which the rates of return were calculated.

B = The total rate of return is calculated by dividing total investment earnings by beginning of year total investments.

C = These relief associations joined the Voluntary Statewide Lump-Sum Volunteer Firefighter Retirement Plan on January 1, 2014. The assets of these relief associations were transferred to the State Board of Investment at the end of 2013, so there were no market values or asset allocations for these associations.
