In 2011, Yellow Medicine County declared to participate in the Performance Measurement Program created by the Council on Local Results and Innovations. The County adopted the ten performance benchmarks developed by the Council and implemented them in 2011. The results of these measures are required to be reported to the Office of the State Auditor on an annual basis. Below are the ten performance measures, goals, and outcomes for 2024:

3. **Performance Measure:** Hours to plow complete system during a snow event.

Performance Goal: On average, it can take 4 to 6 hours to plow the complete system during a snow event. This range is impacted by the variable nature of snow events, and thus can significantly fluctuate from year to year. Therefore, our goal is to ensure the County is using efficient and safe methods for proper snow removal. We will continue to report the average hours to plow each year, but this number will be subjective to the weather and road conditions.

Outcome: During 2024, Yellow Medicine County averaged 4 hours per snow event to plow the complete system.
